Contents

Chapter 1	
Setup instructions	1
Hardware requirements	2
Software requirements	2
Course materials for students	3
Setting up student workstations	3
Setting options in e.Report Designer Professional	3
Configuring an ODBC data source	11
Verifying access to the Sfdata sample database	14
Setting a display appearance option in Microsoft Windows	14
Creating a user and a home folder using Actuate Management Console	15
Chapter 2	
Course introduction	21
Working with Actuate e.Report Designer Professional, Part 1	22
About this course	22
Prerequisites	22
Course objectives	23
What you learn	23
Course agenda – day 1	24
Course agenda – day 2	25
Actuate course curriculum	26
Working with Actuate e.Report Designer Professional	26
Developing Customized Reports	27
Designing and Publishing e.Spreadsheet Reports	27
Working with Formula One e.Report Designer	27
Actuate course curriculum (continued)	28
Managing Actuate iServer System	28
Creating an e.Reporting Web Site using Actuate ReportCast	28
Customizing Actuate Active Portal for JSP	28
Customizing Actuate Active Portal for .NET	29
Actuate Information Delivery API Workshop	29
Integrating and Deploying Formula One e.Report Engine	29
Supporting information	30
Chapter 3	
Actuate and ReportingEngines product overview	31
Actuate and ReportingEngines product overview	32
About Actuate products and their business benefits	33
About Actuate and ReportingEngines	33
Providing business benefits	34
About Actuate reporting solutions	35
Designing reports for your enterprise	35
Managing reports in your enterprise	35
Viewing and distributing reports across your enterprise	36
Benchmarking and improving reporting performance	37
About Actuate 8 products	38
About Actuate design tools	39
About e.Report Designer Professional	39
About e.Report Designer	39

About e.Spreadsheet Designer	39
About Formula One e.Report Designer	40
About Actuate Information Object Designer	40
About Actuate Analytics Cube Designer.	40
Providing report input	41
Data sources accessible to all report design tools	41
Data sources accessible to some report design tools	41
Providing report output.	42
About Actuate Basic reporting with e.Report Designer Professional	43
Supporting intelligent report navigation.	43
Developing a report using object-oriented technology.	43
About Actuate iServer and Actuate management tools	45
About Actuate iServer	45
About Actuate Management Console	45
About Actuate Active Portal	45
About Actuate iServer Options	46
About Actuate viewing tools	48
About Actuate Active Portal	48
About Actuate Management Console	48
About End User Desktop	48
About Actuate Viewer for viewing older reports	48
About Actuate analysis tools	49
About Actuate e.Analysis Option.	49
About Actuate Analytics Option	49
Customizing and extending Actuate	50
Customizing and extending e.Report Designer Professional	50
Extending e.Spreadsheet	51
Extending Formula One	51
Extending Actuate iServer.	51
About customizing and extending Actuate Active Portal	52
Working with an Actuate Basic report on the web	53
Analyzing data in an Actuate Basic report	59
Summary	61
Chapter 4	
Introducing reporting concepts	63
Introducing reporting concepts	64
Overview	65
About e.Report Designer Professional	65
What you learn	65
Key terms	66
Supporting information	66
Understanding report development tasks	67
Planning the report.	67
Accessing data from one or more data sources	68
Structuring report content	69
Laying out the report.	69
Formatting the content.	69
Controlling access to report data	69
Previewing and distributing the report	69
Building a report from components	70
About the types of components	70
Using components to implement the Actuate Foundation Classes	70
About Actuate file types for report design	72

About report object design (.rod) files	72
About report object library (.rol) files.	72
About Actuate Basic source (.bas) files	72
About Actuate file types for report generation and viewing	73
About report object executable (.rox) files	73
About report object value (.rov) files	73
About report object instance (.roi) files.	73
Understanding the report object life cycle.	74
About the Actuate web reporting architecture	75
Publishing a report to an Encyclopedia volume.	75
Using Actuate Management Console.	76
Using Actuate Active Portal	76
Connecting to a database or data warehouse	77
Working with connections	77
Using an ODBC data source.	77
About databases and queries	78
Understanding the database schema	78
Creating a SQL query	78
About joins	79
Exercise 1	80
Drafting a report design.	81
Create your design here	83
Summary	84

Chapter 5

Understanding report development tools85

Understanding report development tools.	86
Overview	87
About the report development environment	87
What you learn	87
Supporting information	87
Working in the report development environment	88
About menus	88
About toolbars	89
About the work area	89
About the status bar	89
Docking, undocking, opening, and closing windows	89
About the perspectives	91
About the design perspective.	92
Understanding design perspective tools	93
Creating a report structure.	93
Using the Properties window	93
Using the Toolbox.	94
About structure components.	95
About data components	95
About controls	95
About drawing and graphical components.	95
About page components	95
Understanding the Layout window	97
About the data perspective	98
About Query Editor	98
Synchronizing a query	99
Using a column alias in a query	100
About Textual Query Editor.	100

Modifying data row variable properties101
Clearing a query using Textual Query Editor101
Sorting data in a query using Textual Query Editor101
About the view perspective.102
About the debug perspective.104
Starting a report design105
About Quick Report Wizard.105
About Listing Report Wizard105
About Blank Report106
Creating a report using Quick Report Wizard107
Using Page Setup112
Setting the paper size.113
Selecting page orientation113
Setting margins113
Summary114

Chapter 6

Creating a grouped report117

Creating a grouped report118
Overview119
About grouped reports.119
What you learn119
Key terms119
Supporting information120
Understanding grouped reports121
Understanding the structure of a grouped report122
Performing a calculation in a report124
About nested groups125
Creating a grouped report126
Using the Listing Report Wizard126
Using the Sorting and Grouping dialog126
Adding a group section component127
Creating a group section128
Exercise 2129
Creating a grouped report without using a report wizard130
Exercise 3158
Creating a grouped report using the Listing Report Wizard159
Modifying a grouped report173
Using GroupOn and GroupInterval179
About GroupOn179
About GroupInterval.180
Exercise 4181
Grouping data by interval (optional)182
About table of contents properties192
About TocAddComponent193
About TocAddContents193
About TocValueExp193
Configuring and testing the table of contents195
Summary199

Chapter 7

Creating a report that uses parameters201

Creating a report that uses parameters202
--	------

Overview	203
About report parameters	203
What you learn	203
Key terms	203
Supporting information	204
Displaying parameters in a SQL query	205
Adding parameters to a query	205
About simple parameters	205
About ad hoc parameters	205
Setting parameter display properties	207
About general parameter properties	208
About advanced parameter properties	209
Using a report object values (.rov) file	210
Using an ROV on the desktop	210
Using an ROV on Actuate iServer	211
Exercise 5	212
Creating simple and ad hoc parameters using Query Editor	213
Exercise 6	231
Publishing and previewing a report on Actuate iServer	232
Exercise 7	238
Creating a report object values file (optional)	239
Summary	249
Chapter 8	
Review exercise – day 1	251
Review exercise – day 1	252
Creating a grouped report	253
Chapter 9	
Creating a crosstab report	255
Creating a crosstab report	256
Overview	257
About crosstab reports	257
What you learn	258
Key terms	258
Supporting information	258
Recognizing the parts of a crosstab report	259
Exercise 9	260
Creating a crosstab report	261
Summary	270
Chapter 10	
Working with parallel and sequential sections	271
Working with parallel and sequential sections	272
Overview	273
About parallel and sequential sections	273
What you learn	273
Key terms	273
Supporting information	274
Understanding parallel sections	275
Examining a parallel section	276
Exercise 10	277
Creating a report using a parallel section	278

Understanding sequential sections286
Examining a sequential section.287
Exercise 11289
Creating a report using a sequential section290
Summary295

Chapter 11

Working with a dynamic text control297

Working with a dynamic text control298
Overview299
About dynamic text controls299
What you learn299
Supporting information300
Examining formatted text in a dynamic text control.301
Comparing a text control and a dynamic text control302
Understanding dynamic text control features305
Understanding support for data in plain text, HTML, and RTF formats.305
Understanding dynamic resizing.305
Understanding consistent output generation306
Understanding properties for optimizing output.306
Understanding default control size and position.307
Adjusting default dynamic text control behavior308
About default dynamic text control behavior308
Changing default sizing behavior308
Controlling movement of other controls.308
Changing control expansion behavior309
Adjusting control positioning behavior309
Controlling how a frame splits across pages.309
Understanding VerticalPosition values310
Understanding VerticalSize values.311
Understanding font requirements312
Using font information to generate text in a dynamic text control312
Looking for font information in multiple sources.312
Embedding font information in the report object executable file313
About font installation requirements for users313
Examining a report that uses a dynamic text control314
Exercise 12318
Modifying a report to use a dynamic text control319
Using a dynamic text control in a nested frame324
Using a nested frame.324
Processing a control in a nested frame324
Exercise 13326
Resolving output display issues327
Summary333

Chapter 12

Creating a chart335

Creating a chart336
Overview337
About charts.337
Key terms338
Supporting information338
Understanding chart types339

Recognizing the parts of a chart	341
Setting the properties of a chart control	343
About Chart Builder	344
Selecting a chart type	345
About overlay and study charts	346
Adding an overlay or study chart.	346
About the overlay chart.	346
About the study chart.	347
Obtaining data for a chart.	348
Selecting data	348
Selecting data for the value axis	349
Selecting data for the categories and series	349
Plotting empty values	350
Formatting a chart	351
Formatting a title	351
Working with a legend	352
Formatting additional chart properties.	352
Formatting a chart's axes	352
Adding data values to data points.	353
Creating a hyperlink from a chart	353
Formatting sample data.	353
Exercise 14	354
Creating a stock chart	355
Sorting and grouping chart data	364
Managing missing data	365
Adding categories and series	365
Summary	372
Chapter 13	
Creating a hyperlink	375
Creating a hyperlink.	376
Overview	377
About hyperlinks	377
What you learn	377
Key terms	378
Supporting information	378
Writing a link expression	379
Defining a hyperlink	379
Understanding URL syntax	380
Understanding search expression syntax	380
Understanding dynamic report parameter syntax	382
Adding a data value to a link expression	383
Exercise 15	384
Creating a hyperlink within a report	385
Exercise 16	391
Creating a hyperlink to an external report	392
Creating a hyperlink from a chart	399
About hypercharts	399
Creating a hyperchart URL	399
Exercise 17	401
Creating a hyperchart	402
Exercise 18	413
Creating a dynamic hyperlink (optional)	414
Summary	420

Chapter 14	
Using conditional formatting	423
Using conditional formatting	424
Overview	425
About conditional formatting	425
What you learn	426
Supporting information	426
Modifying a method to set conditional formatting	427
About Actuate Basic methods	427
About the OnRow() method	427
About the Finish() method	427
About component inheritance	428
Understanding how a component inherits behavior or properties	428
Inheriting from a superclass	428
Exercise 19	430
Conditionally formatting a component	431
Summary	436
Chapter 15	
Review exercise – day 2	437
Review exercise – day 2	438
Creating a sequential report	439
Index	441
Quiz answers	473
